MASSHEALTH OVERVIEW

MassHealth is Massachusetts’ name for its Medicaid and Children’s Health Insurance (CHIP) programs. MassHealth provides coverage for over 1.8 million members — more than a quarter of the state’s residents — and has been the centerpiece of state health care reform. MassHealth is an important contributor to the state’s high insured rate. Currently, more than 96% of Massachusetts residents are covered by health insurance.

MASSHEALTH BENEFITS

MassHealth serves as a safety net — the insurer of last resort — for some of the state’s most disadvantaged residents and many with very complex health care needs. MassHealth covers low-income families for whom employer-sponsored coverage is unavailable or unaffordable, people who are affected by economic downturns, and people with physical, behavioral, and intellectual disabilities, among others. It offers assistance with premiums and co-payments, and provides additional benefits to people who have another source of primary coverage, such as Medicare, an employer, or a student plan but who are challenged by the cost of that coverage. Access to MassHealth coupled with other health care reform has been associated with reductions in the uninsured rate, increases in preventive service utilization, and improvements in physical and mental health.

MassHealth benefits other stakeholders in the health care system. It pays health care providers (primary care physicians, community health centers, hospitals, nursing homes, and others) for treatments that would otherwise go uncompensated or would not be provided at all. It benefits employers by covering some of the highest-cost services for their employees and employees’ dependents with disabilities. It brings billions of federal dollars to the state: the program is administered by the state but funded jointly by the state and federal governments. These federal funds help stretch dollars that the state spends for health care and long-term care for populations with a high level of need.

MASSHEALTH CHALLENGES

Recently, there has been debate and attention on whether the level and rate of growth in MassHealth spending are sustainable. MassHealth spending has grown from $7.5 billion in 2007 to $15 billion in 2017, at a rate, adjusted for medical cost inflation,* of around 3% per year. After double-digit increases from 2013 to 2016, driven largely by increased enrollment from the Affordable Care Act’s Medicaid expansion, spending growth moderated from 2016 to 2017, with a medical-cost-inflation-adjusted rate of 0.4%. Two fast-growing components of spending are long-term services and supports (LTSS) and pharmacy. Community-based LTSS (including home health services, personal care, and adult day health) exceeded $2 billion in 2017, reflecting a successful policy shift away from facility-based to community-based care. Rising drug prices continue to be a challenge.

MassHealth is now implementing a comprehensive strategy to manage costs, while also improving quality and the member experience, by better integrating services and basing payments on value rather than volume. Over 885,000 MassHealth members have been enrolled in new Accountable Care Organizations (ACOs), which began full operation in March 2018. Members may be eligible for additional supports from newly formed Behavioral Health Community Partners or LTSS Community Partners. Some members may also be eligible for certain housing or nutritional supports through newly approved flexible services.

* Medical cost inflation is calculated using the consumer price index for medical care, which measures inflation of out-of-pocket medical care, including payments for health care goods, health care services, and health insurance premiums.
MassHealth: The Basics

KEY FINDINGS

**ENROLLMENT**

More than **1.8 million** members

42% of Massachusetts children are MassHealth members

Relatively stable enrollment for past 4 years (SFY 2015–2018)

**SPENDING**

MassHealth spending is shared by the state and federal governments

Spending growth **moderated** from 2016 to 2017

Prescription drugs and home- and community-based LTSS are key cost drivers

**INNOVATIONS**

Half of members in ACOs*

 Efforts to improve integration of behavioral health, LTSS, and social services

Newly covered substance use disorder services

* Among managed care eligible members, over 75% are enrolled in ACOs.
MASSHEALTH PROVIDES COVERAGE SIMILAR TO COMMERCIAL INSURANCE, PLUS SOME ADDITIONAL BENEFITS

<table>
<thead>
<tr>
<th>Typical Commercial Insurance Coverage</th>
<th>Additional Benefits</th>

<td></td>
</tr>
</tbody>
</table>

¹ LTSS and transportation to medical appointments are available to most but not all MassHealth members.

MASSHEALTH IMPROVES ACCESS TO CARE AND HEALTH OUTCOMES

Massachusetts expanded MassHealth over the course of decades. These expansions have given researchers opportunities to study the effects of MassHealth.

In 2006 a comprehensive package of reforms expanded MassHealth eligibility again. These reforms also made subsidized coverage available on the Health Connector (Massachusetts’ state-based health insurance marketplace) and implemented insurance mandates for individuals and employers. Vehicles for expansion included a second extension of the 1115 waiver, approved in 2005, and state legislation (Chapter 58 of the Massachusetts Acts of 2006).

Looking at the Massachusetts population today, MassHealth coverage is associated with financial protection and increased affordability for health insurance and care.\(^5\)

IMPACTS:
- A dramatic drop in the uninsured rate, for both adults and children.\(^1\)
- MassHealth coverage rose 21% among individuals entering substance use disorder treatment programs.\(^2\)

IMPACTS OF MASSHEALTH EXPANSION ASSOCIATED WITH:
- A more than 5% drop in the uninsured rate among children eligible for MassHealth.\(^3\)

IMPACTS OF MASSHEALTH EXPANSION, IN COMBINATION WITH OTHER 2006 REFORMS, ASSOCIATED WITH:
- A drop of 50%, or almost 3 percentage points, in the uninsured rate for all Massachusetts children.\(^3\)
- Massachusetts becoming the state with the highest rate of insurance among all states.\(^4\)
- Measurable improvements in physical and mental health for adults and children.\(^4\)
- Increased use of preventive care for adults and children (pap screening, cholesterol testing, colonoscopies, pediatric checkups).\(^4\)

**MASSHEALTH INCOME LIMITS VARY FOR DIFFERENT AGES AND ELIGIBILITY GROUPS**

**CONCLUSION**

---

MassHealth eligibility includes nuances not included in this chart; MassHealth staff can help determine eligibility. Additional information can be found at https://www.mass.gov/service-details/masshealth-coverage-types-for-individuals-and-families-including-people-with.

FPL = income as percent of federal poverty level; in 2018, 100% FPL for an individual was $12,140 annually.

Eligibility for all Home- and Community-Based Waivers except one (the waiver for Young Children with Autism) is based on 300% of the Supplemental Security Income (SSI) Federal Benefit Rate (FBR). FBR is a metric used by the Social Security Administration and tied to the consumer price index. In 2018, 300% SSI FBR for an individual was $27,022 annually (229% FPL for an individual).

NOTES: MassHealth Limited, not shown in chart, provides emergency health services to people who, under federal law, have an immigration status that keeps them from receiving more services. Income eligibility for this population is similar to MassHealth Standard: 200% FPL for pregnant women and children up to age 1; 150% FPL for children ages 1–20 years; 133% FPL for adults 21–64.

**SOURCES:** 130 C.M.R. §505; 130 C.M.R. §519; MassHealth (2019). Member Booklet for Health and Dental Coverage and Help Paying Costs.
ELIGIBILITY FOR SENIORS AGE 65 AND OLDER GENERALLY INCLUDES AN ASSET TEST AND LOWER INCOME THRESHOLDS; MOST SENIORS ALSO HAVE MEDICARE

<td>No specific income limit ≤$2,000 Assets</td>
<td>MassHealth Standard — Including LTSS. Member must pay income minus monthly allowances³ toward nursing facility care.</td>
</tr>
</tbody>
</table>

¹ MassHealth eligibility includes nuances not included in this chart; for example, parents of minors and seniors who work have different eligibility requirements. MassHealth staff can help determine eligibility.

² Certain assets — home (in most cases), vehicle, life insurance up to $1,500, funeral and burial expenses up to $1,500 — are excluded. In certain cases, asset spend-down is available. Income and asset considerations are based in part on federal law.

³ Allowances include personal need allowance and spousal maintenance allowance, among others.

NOTES: Asset limits listed are for individuals; the amounts for couples are higher. Seniors (age 60 or older) can qualify for MassHealth through the Frail Elder Waiver with income up to 300% of the federal benefit rate (FBR) ($27,756 in 2019). Other Home and Community Based Services (HCBS) waivers are available as well. Seniors may also be eligible for ConnectorCare and Advance Premium Tax Credits for insurance purchased through the Health Connector.

THERE ARE MANY DOORS INTO MASSHEALTH

**Individuals** apply directly, by phone, on paper form, in person with assistance at a MassHealth Enrollment Center or Health Connector walk-in center, or through the Health Connector website, an integrated eligibility system that allows users to shop and apply for MassHealth and other health insurance programs.

**Health care providers** assist patients with applications.
- Hospitals
- Community health centers
- Nursing homes
- Other providers

**State agencies** facilitate applications.
- Department of Developmental Services
- Department of Mental Health
- Massachusetts Rehabilitation Commission
- Department of Transitional Assistance
- Department of Children and Families
- Other agencies

**Community organizations and advocacy groups** provide health care referrals and access to MassHealth.
- My Ombudsman. This nonprofit organization answers questions, provides information, and works with health plans and MassHealth to ensure members can access their benefits.
- Community action programs
- Community development corporations
- Aging services access points
- Health Care For All
- Other community organizations designated as Enrollment Assisters

**Appeals and Grievances**
If an applicant disagrees with MassHealth’s denial of coverage, the applicant can appeal the decision within 30 days using the Fair Hearing Request Form. Applicants and members can also file grievances at any point for any type of problem, including issues with the quality of medical care, waiting times, or customer service.
MASSHEALTH ENROLLMENT HAS BEEN RELATIVELY STABLE FOR THE PAST FOUR YEARS

MassHealth enrollment has been relatively stable for the past four years (SFY 2015-2018), hovering just above 1.8 million members.

Before this time, MassHealth enrollment grew steadily over the past decade, with large increases in 2014 and 2015 coinciding with ACA implementation.*

The high level of MassHealth participation contributes to Massachusetts’ lowest-in-nation uninsured rate, which averaged approximately 3.7% of the Massachusetts population from 2014 to 2017 (the latest data available).

*T MassHealth enrollment grew at this time both because of the ACA’s eligibility expansion and also because of a technological issue with the state’s eligibility system, which resulted in some people being enrolled in a temporary Medicaid program.

CHILDREN, SENIORS, AND PEOPLE WITH DISABILITIES MAKE UP OVER 60% OF THE MASSHEALTH POPULATION

PERCENT OF TOTAL MASSHEALTH ENROLLMENT (1.86 MILLION), SFY 2018

MassHealth members range from the very young to the very old. Children comprise 38% of MassHealth members. Adults with disabilities (under age 65) and children with disabilities represent 17% of membership. One out of 10 MassHealth members is age 65 or over. Most of these seniors also have Medicare coverage, and most live in non-facility settings in their communities.

Some MassHealth members (of all ages) have coverage through Medicare, an employer-sponsored plan, or student health insurance (this additional coverage is not shown in the chart). In those cases, MassHealth acts as secondary coverage. In certain instances, MassHealth may be able to provide secondary coverage or supplemental coverage — in the form of additional or augmented covered services — in instances when a member has alternative insurance that may not provide coverage for certain needed services.

SOURCE: MassHealth Budget Office.

1 Children defined as under age 21.

2 In certain instances, MassHealth may be able to provide secondary coverage or supplemental coverage — in the form of additional or augmented covered services — in instances when a member has alternative insurance that may not provide coverage for certain needed services.

<td>24%</td>
</tr>
</tbody>
</table>

More than 4 in 10 children in Massachusetts and about one-quarter of adults under age 65 are MassHealth members. MassHealth is an especially important source of coverage for people with low incomes and people with disabilities. About three-fifths of people with incomes below 133% of the federal poverty level (about $16,000 annually for a one-person household in 2017) and more than half all Massachusetts residents with disabilities are on MassHealth. Six out of 10 nursing home residents are MassHealth members.

* Deaf or serious difficulty hearing; blind or serious difficulty seeing; cognitive, ambulatory, self-care, or independent living difficulty.

ADULTS ENROLLED IN MASSHEALTH HAVE PARTICULARLY LOW INCOMES — MOST BELOW 86% FPL ($10,440 FOR AN INDIVIDUAL)

INCOME AS PERCENT OF FEDERAL POVERTY LEVEL (FPL) BY AGE GROUP FOR MASSHEALTH ENROLLEES

- Nearly 70% of adults enrolled in MassHealth have an income below 86% FPL, which in 2018 corresponded to:
  - $10,440 for an individual
  - $14,156 for a family of 2
  - $17,871 for a family of 3
- Because children’s eligibility extends farther up the income scale, a larger share of children enrolled in MassHealth live in families with incomes above the federal poverty level.

Reflects individuals enrolled in MassHealth as of June 30, 2018. In 2018, for a family of three, 86% FPL was $17,871, and 133% FPL was $27,637.

86% FPL reflects an income eligibility limit that applied to certain MassHealth eligibility categories prior to expansions that have occurred over time. Most enrollees continue to have incomes below this level.

MASSHEALTH PLAYS A KEY ROLE IN SUPPORTING THE LOW-INCOME WORKFORCE

More than three quarters of non-elderly MassHealth members live in working families.

MassHealth provides health insurance coverage to low-income workers across a wide range of industries:

- **SALES** (cashiers, retail salespeople, travel agents)
- **FOOD SERVICE** (fast food workers, cooks, waiters)
- **CLEANING AND MAINTENANCE** (housekeepers, janitors, landscapers)
- **HEALTH CARE SUPPORT** (nursing and home health aides, medical and dental assistants)
- **CONSTRUCTION** (carpenters, laborers, painters)
- **PERSONAL CARE AND SERVICES** (ushers, child care workers, baggage porters)
- **TRANSPORTATION** (bus and taxi drivers, parking attendants)
- **OFFICE AND ADMINISTRATIVE SUPPORT** (hotel desk and office clerks, telemarketers)

### POPULATIONS SERVED | MANAGED CARE PROGRAM | COVERED SERVICES
--- | --- | ---
MassHealth Standard, Family Assistance, CommonHealth, and CarePlus members under age 65 | Accountable Care Partnership Plans and Primary Care ACOs (Model A and Model B ACOs) | Medical and behavioral health services are covered through alternative payment methods to the ACO (which vary by model and risk track). LTSS and dental benefits are not included through ACOs but are available through MassHealth fee-for-service payments.

MassHealth Standard, Family Assistance, and CarePlus members under age 65 | Managed Care Organizations (MCO) and MCO-Administered ACOs (Model C ACOs) | Medical and behavioral health services are covered through a capitated payment to MCOs. LTSS and dental benefits are not included in the MCO benefit but are available through MassHealth fee-for-service. MCOs can subcontract with MCO-administered ACOs using alternative payment methods.

MassHealth Standard, Family Assistance, and CarePlus members under age 65 | Primary Care Clinician (PCC) Plan | Medical services are paid fee-for-service and are managed by a primary care clinician. Behavioral health services are covered by a capitated payment to a behavioral health plan. Dental and LTSS benefits are available and paid fee-for-service.

Ages 21–64 with MassHealth and Medicare | One Care | Full spectrum of services, including LTSS, dental, and behavioral health, covered through a capitated payment to a single health plan.

Ages 55+; must meet clinical eligibility for nursing facility level of care | Program of All-Inclusive Care for the Elderly (PACE) | Full spectrum of services, including LTSS, dental, and behavioral health, covered through capitated payment to a single provider. Care is integrated via an interdisciplinary care team, with many services provided at an adult day health center.

Ages 65+ most of whom also have Medicare coverage | Senior Care Options (SCO) | Full spectrum of services covered through a capitated payment to a single health plan (includes LTSS, dental, behavioral health).

---

1 For more information on each of these programs, please see these educational materials developed by MassHealth: MassHealth Health Plan Information, ACOs, MCOs, and the PCC Plan, Enrolling and Receiving Care Under Senior Care Options (SCO), One Care website, PACE website.

2 Fee-for-service (FFS) payment: A payment made to providers for each service delivered.

3 An MCO may contract with an MCO-administered ACO.

4 Capitated payment: A monthly payment to a health plan for each enrollee. In return, the health plan must provide or arrange for all medically necessary covered services.

**SOURCES:** 130 C.M.R. §505; 130 C.M.R §508.
AMONG MASSHEALTH MEMBERS, 70% ARE ENROLLED IN MANAGED CARE, WITH HALF OF MEMBERS IN ACOs

MassHealth members receive several varieties of managed care. Members under age 65 can enroll in a new MassHealth-contracted private ACO, a MassHealth-contracted private MCO (with the option of an MCO-administered ACO), or the MassHealth-administered Primary Care Clinician (PCC) Plan. Members with disabilities under 65 who have MassHealth and Medicare can enroll in One Care. Following the full implementation of the MassHealth ACO program in March 2018, over half of MassHealth members are now enrolled in an ACO.

Seniors may enroll in Senior Care Options (SCO) or, if they have significant disabilities, in the Program of All-Inclusive Care for the Elderly (PACE, available for members age 55 and older).

Members not in managed care are in fee-for-service (FFS) plans. They include members with Medicare not enrolled in One Care, SCO, or PACE; people with other coverage as primary (e.g., employer-sponsored insurance); people who live in an institution; and people with limited coverage due to their immigration status.

---

1 Premium assistance recipients include members who receive premium subsidies from MassHealth for employer-sponsored health insurance. MassHealth Limited provides coverage for emergency medical services for 152,473 noncitizens.

2 The MCO population includes members who are also enrolled in an MCO-administered ACO (Model C).

THE MAIN SOURCE OF FEDERAL REVENUES TO MASSACHUSETTS IS MASSHEALTH

Federal revenues supply about one-quarter of the funding for the state budget, and about 85% of that revenue is generated by Medicaid and CHIP expenditures.

The federal government reimburses the Commonwealth for 50% of most Medicaid expenditures and 88% of CHIP expenditures. Members made eligible under the ACA Medicaid expansion draw an even higher federal match; the federal government reimbursed the Commonwealth for 93% of Medicaid expenditures for this population in CY 2019.

NOTE: Medicaid in this context includes MassHealth, Commonwealth Care (prior to 2014), and ConnectorCare premium and cost-sharing subsidies (post-2014); additional MassHealth 1115 waiver spending; and spending on some programs and facilities that serve people eligible for MassHealth and are administered by the Departments of Developmental Services, Mental Health, and Public Health, and the Massachusetts Rehabilitation Commission.

SOURCE: Massachusetts Budget and Policy Center.
EVERY STATE DOLLAR IN MASSHEALTH SPENDING IS MATCHED BY AT LEAST A DOLLAR IN FEDERAL REVENUE TO THE STATE

<td>50%</td>
<td>50%</td>
</tr>
</tbody>
</table>

Because of federal matching for MassHealth expenditures (see previous slide), every state dollar in MassHealth spending is matched by at least a dollar in federal revenue to the state.

Specifically, every dollar Massachusetts spends on CHIP brings in over $7 in federal revenue (until September 2019).¹ Every dollar Massachusetts spends on the ACA expansion population brings in $13 (until January 2020).² And every dollar Massachusetts spends on most other MassHealth expenditures brings in $1.

¹ Children’s Health Insurance Program (CHIP) matching assistance will decrease from 88% to 76.5% in FY 2020; it is set to decrease again in FY 2021.
² Federal Medical Assistance Percentages (FMAP) for the ACA expansion population will decrease from 93% to 90% in CY 2020.

TO UNDERSTAND THE TRUE COST OF MASSHEALTH TO THE STATE, IT IS INSTRUCTIVE TO LOOK AT THE STATE SPENDING NET OF FEDERAL REVENUES

Massachusetts’s fiscal year (FY) 2019 budget is approximately $46.6 billion, of which about one-quarter was supplied by federal revenues. Medicaid/CHIP generated the vast majority (85%) of those federal revenues (see slide 16.) To understand the true cost of MassHealth to the state, it is instructive to look at the state spending net of federal revenues; this net state budget totaled $35.0 billion in FY 2019. The state’s share of MassHealth costs is approximately 24% of the state budget net of federal revenues.

From FY 2016 to FY 2019, other state budget amounts increased by an average of 2.7% per year, while the MassHealth budget increased by an average of 3.8% per year (not shown in charts)*.

*Information based on data provided by Massachusetts Budget and Policy Center staff.

MassHealth program spending has more than doubled in 10 years, from $7.5 billion in SFY 2007 to $15 billion in SFY 2017. When adjusted for medical cost inflation\(^1\), however, the average annual increase from SFY 2007 to SFY 2013 was less than 3%.

When adjusted for medical cost inflation, annual increases from SFY 2013 to SFY 2016 were more significant (9.7%, 11.8%, and 13.0%, respectively). Most of that growth is attributable to enrollment increases resulting from the ACA expansion. Additionally, from SFY 2016 to SFY 2017, the pace of spending growth moderated as enrollment leveled off post-ACA, with an increase of 0.4%.\(^2\)

The data included here represents all MassHealth members. A separate analysis by the state Health Policy Commission focused on MassHealth members in Primary Care Clinician and Managed Care Organization plans (and did not include members in fee-for-service, SCO, and One Care) found that MassHealth total spending **declined** 1.1% among such enrollees from SFY 2016 to SFY 2017.

---

\(^1\) Medical cost inflation refers to the consumer price index specifically for medical care.

\(^2\) Please note that this slide contains actual programmatic spending data while the previous slide contains projected budget/revenue data.

\(^3\) Inflation adjustment uses the Medical Consumer Price Index for the Boston area, from the U.S. Bureau of Labor Statistics. This analysis reflects gross spending amounts, including both state and federal revenues. The spending amounts include claim and capitation payments for medical benefits provided by MassHealth, and do not include the cost of Medicare or commercial premiums, Medicaid-reimbursable services from other state agencies, administrative spending, or risk corridor payments to managed care plans, or supplemental payments to providers.

Until 2015, the main driver of MassHealth spending growth was the increasing number of MassHealth members. Although growth in per member per month (PMPM) spending has remained relatively low, PMPM spending has become the primary driver in overall MassHealth spending growth as enrollment has levelled off.

PMPM spending, not adjusted for inflation, grew on average 2% per year from SFYs 2007 through 2017.

*These data include enrollment and spending associated with the temporary Medicaid program that was initiated in 2014.

Sources: MassHealth Budget Office (total date of service spending and enrollment) and authors’ calculations.
NEARLY HALF OF MASSHEALTH SPENDING IN FISCAL YEAR 2017 WAS ON CAPITATION PAYMENTS

TOTAL MASSHEALTH SPENDING = $14.04 BILLION, SFY 2017

MassHealth spent $14.04 billion\(^1\) on services for its members in SFY 2017. Nearly half of that spending ($6.91 billion) was capitation payments to MCOs, the PCC Plan’s behavioral health carve-out vendor, SCOs, One Care plans, and PACE providers. Breakdowns of MCO and PCC spending by service are shown on the following slides. In SFY 2017, approximately 70% of MassHealth members were enrolled in one of these managed care arrangements.

For members in managed care plans, some services are paid for under fee-for-service arrangements, including the majority of LTSS provided to managed care members. As a result, the majority of fee-for-service payments went to LTSS and nursing facilities.

\(^1\)Unlike totals shown on earlier slides, this total does not include spending on Medicare premiums. The figures also do not include Medicaid-reimbursable services from other state agencies, administrative spending, or supplemental payments to hospitals.

\(^2\)These financial data pre-date the implementation of ACOs so they are not included in these capitation payments.

**SOURCE:** MassHealth Budget Office SFY 2017.
Within MCO Capitation, PMPM Pharmacy Spending Grew Faster Than Spending on Any Other Services From 2013–2016

Among categories of per member per month (PMPM) spending on services provided under the MassHealth MCO capitation, pharmacy spending grew fastest. MassHealth MCO PMPM pharmacy spending rose 41% from SFY 2013 to SFY 2016, from $69 to $97. During the same time period, pharmacy spending for fee-for-service and in the PCC Plan rose 21% (see next slide).

Meanwhile, pharmacy spending was rising nationwide, in part because of high-cost drugs such as the medication for hepatitis C.

Massachusetts is implementing approaches to moderating spending growth, including holding ACOs accountable for pharmacy spending and promoting reforms to give the state new authority to negotiate supplemental rebates.

*Includes dental, home health, community health, long-term care, and “non-claim” costs.

Source: Boozang, P., et al. (2018). Addressing Major Drivers of MassHealth Per-Enrollee Spending Growth: An Analytic Review and Policy Options. Blue Cross Blue Shield Foundation of Massachusetts. This chart does not include spending for SCO, One Care, PACE, or the PCC Plan’s behavioral health carve-out vendor.
OUTSIDE OF CAPITATION, PMPM SPENDING ON HCBS LTSS GREW FASTER THAN OTHER SERVICES FROM 2013–2016

For services paid fee-for-service (FFS) or through the Primary Care Clinician (PCC) Plan, per member per month spending grew fastest for home- and community-based long-term services and supports (HCBS LTSS) over SFY 2013–2016.

HCBS LTSS includes home health services, personal care, and adult day health care, whereas facility-based LTSS includes nursing facility spending. Because MCOs do not cover most LTSS, most of the spending is in FFS and the PCC Plan. In other words, MassHealth members enrolled in MCOs still received LTSS paid for via FFS.

During FY 2016, Massachusetts ranked fourth highest among the states for percentage of Medicaid HCBS LTSS spending. As a result of changing its facility/HCBS spending mix toward care in the community, Massachusetts received enhanced federal matching funds through the federal Balancing Incentives Program.

The state is exploring approaches to moderate LTSS spending growth, including managed LTSS.

1 Much of the increase in LTSS spend was driven by home health services, for which MassHealth implemented a moratorium on new providers in 2016.

2 Refers to home- and community-based services.

3 Includes transportation and durable medical equipment.

4 The Balancing Incentives Program, created by the Affordable Care Act, offers states enhanced federal funding for LTSS if they meet certain conditions around improving access to HCBS LTSS.

MassHealth spending is not spread evenly across the various categories of members. Approximately 59% of spending in SFY 2017 was for services to people with disabilities and seniors. These groups make up about one-quarter (26%) of the MassHealth membership.

SOURCE: MassHealth Budget Office, SFY 2017 date of service spending.
MASSHEALTH SPENDING INCREASED MOST FOR SENIORS AND ADULTS WITH DISABILITIES, SFY 2015–2017

Seniors, who are more likely to have chronic conditions and complex health care needs, account for the highest level of MassHealth spending per member per year, followed by adults and children with disabilities. MassHealth members who do not have disabilities have much lower levels of spending.

Over SFY 2015–2017, per member spending, not adjusted for inflation, increased most rapidly for seniors and adults with disabilities, both as a rate (about 7.6% and 7%, respectively) and in absolute terms (about $1,400 and $1,000, respectively). For these two groups and for children with disabilities, increases in total spending reflect increases in spending per member more closely than they do in increases in enrollment. Among adults who do not have disabilities and children who do not have disabilities, the growth in per member spending is less of a factor.

SOURCE: Calculations based on total spending and member months from the MassHealth Budget Office; data as of January 2019. Based on date of service spending. Excludes spending and enrollment for the Temporary Medicaid category.
MassHealth represents a significant portion of health care providers’ revenues. This is especially the case for nursing homes and community health centers, which on average receive half of their total patient revenues from MassHealth.

MassHealth covers the prenatal care for a third of all births in Massachusetts. Prenatal care is delivered by a mix of providers.

---

1 Includes spending for home health care, durable medical supplies, Medicaid HCBS waivers, and care provided in residential care facilities. The source data also bundles in ambulance services, school health, and worksite health care, which make up a very small piece of these services.

2 Percentage of births whose prenatal care was paid for by MassHealth.

**MASSACHUSETTS ADMINISTERS MOST OF MASSHEALTH THROUGH WAIVERS**

| WHAT IS A WAIVER? | States may request approval from the federal government to waive certain parts of federal Medicaid law in order to test program innovations or gain more flexibility in how they deliver and pay for Medicaid services. MassHealth gains flexibility through both Section 1115 and Section 1915(c) waivers. |
| 1115 DEMONSTRATION WAIVER | The MassHealth program operates under the authority of an 1115 demonstration waiver for almost all members. The waiver first took effect in 1997 and has evolved through six extensions to expand coverage, support the safety net, provide incentives for delivery system innovations, and serve as a platform for health care reform. An important condition of all 1115 waivers is that they be “budget neutral,” meaning the federal government will contribute no more to a waiver program than it would to a Medicaid program operating under standard rules. Through the latest extension, approved in November 2016, MassHealth is implementing a new Accountable Care Organization (ACO) program, new models of addressing member needs using Community Partners and flexible services, and expanded coverage of substance use disorder (SUD) services. |
| 1915(c) HOME- AND COMMUNITY-BASED SERVICES WAIVERS | Home- and community-based services (HCBS) waivers permit states to provide LTSS in a home or community setting to members whose disabilities qualify them for an institutional level of care. Services can include home health care, personal care, habilitation, respite, physical and occupational therapy, group adult care, home modification, assistive technology, behavioral health, among others. MassHealth obtains federal matching funds on expenditures made by the agencies that authorize and oversee the services, such as the Executive Office of Elder Affairs, the Department of Developmental Services, the Department of Mental Health, and the Massachusetts Rehabilitation Commission. The state must demonstrate that providing the HCBS waiver services does not cost more on average than providing those services in an institution. In addition, the programs may have enrollment limits. MassHealth has 10 HCBS waivers, which are an important component of the Commonwealth’s “Community First” policy. The waiver programs are targeted to specific populations:  
  ▪ Elders aged 60 and over (Frail Elder Waiver)  
  ▪ Adults aged 22 and over with intellectual or developmental disabilities (Community Living, Intensive Supports, and Adult Supports Waivers)  
  ▪ Adults aged 18 and over with traumatic brain injury (TBI Waiver)  
  ▪ Adults aged 22 and over with acquired brain injury (ABI Residential and ABI Non-Residential Waivers)  
  ▪ Adults and elders aged 18 and over who are moving from a facility back to the community (Moving Forward Plan (MFP) Community Living and MFP Residential Supports Waivers)  
  ▪ Children aged 0 to 8 with autism (Children’s Autism Spectrum Disorder Waiver) |

THE 2016 EXPANSION OF THE MASSHEALTH 1115 WAIVER INCLUDES DELIVERY SYSTEM CHANGES AND EXPANDED COVERAGE OF SUBSTANCE USE DISORDER SERVICES

- The expansion authorizes $52.4 billion in state and federal spending over five years.
- From that $52.4 billion total, it authorizes $1.8 billion over five years in state and federal funding for delivery and payment reform. It establishes:
  - Accountable Care Organizations (ACOs), entities held accountable for their populations’ health and health care costs.
  - Behavioral Health Community Partners and LTSS Community Partners, entities partnering with ACOs to support members seeking services.
  - Statewide investments to support workforce development and improved access to care.
  - Flexible services to address social determinants of health.
- The expansion maintains but reforms supplemental payments to hospitals and other safety-net providers.
- The expansion improves access to a wide range of substance use disorder services.
- The expansion bases a portion of federal MassHealth funding on the state’s performance.

THE DELIVERY SYSTEM REFORM INCENTIVE PAYMENT (DSRIP) PROGRAM INVESTS SUBSTANTIAL FUNDS IN THE STATE’S HEALTH CARE DELIVERY SYSTEM

The 1115 waiver agreement includes authorization for $1.8 billion in federal and state funds to support delivery system transformation.

ACCOUNTABLE CARE ORGANIZATIONS: PROVIDER ENTITIES HELD FINANCIALLY ACCOUNTABLE FOR THE COST AND QUALITY OF CARE FOR THEIR MEMBER POPULATIONS

THREE VARIETIES OF MASSHEALTH ACOs

**ACCOUNTABLE CARE PARTNERSHIP PLAN**
- Contract between MassHealth and Accountable Care Partnership Plan
  - Capitation payment
  - Requires Accountable Care Partnership Plans to provide and pay for comprehensive health services to enrollees
  - **13 ACOs SELECTED BY THE STATE**
  - ~530,000 MEMBERS ENROLLED
  - ON AVERAGE, ~41,000 MEMBERS/ACO

**PRIMARY CARE ACO**
- Contract between MassHealth and ACO
  - Shared savings and losses
  - MassHealth does not pay Primary Care ACOs to deliver direct services; rather, MassHealth pays for services directly
  - **3 ACOs SELECTED BY THE STATE**
  - ~345,000 MEMBERS ENROLLED
  - ON AVERAGE, ~115,000 MEMBERS/ACO

**MCO**
- Contract between MassHealth and MCO
  - Capitation payment
  - Requires MCOs to provide and pay for comprehensive health services to enrollees
  - Requires MCOs to contract with MassHealth-certified MCO-administered ACOs

**MCO-ADMINISTERED ACOs**
- Contract between MCO and ACO
  - Contract approved by MassHealth
  - Shared savings and losses
  - MCO does not pay MCO-administered ACOs to deliver direct services; rather, MCO pays for services directly
  - **1 ACO SELECTED BY THE STATE**
  - ~10,000 MEMBERS ENROLLED

COMMUNITY PARTNERS PROVIDE CARE COORDINATION AND NAVIGATION SUPPORTS FOR CERTAIN MEMBERS

- MassHealth has selected nine entities to participate as LTSS Community Partners (CPs) and 18 as Behavioral Health CPs.
- CPs promote integration of care, improved member experience, and continuity and quality of care for members with complex needs.
- ACOs are required to partner with multiple CPs, which make available the capabilities and cultural/linguistic expertise of existing community-based organizations.
- CPs perform outreach and engagement, participate in care teams, engage in person-centered treatment planning, coordinate services, support care transitions, provide health and wellness coaching, and facilitate access to social and community services.
- Members may be eligible to participate in CPs if they are enrolled in an ACO, in an MCO, or in the Department of Mental Health’s Adult Community Clinical Services.

NEW FLEXIBLE SERVICES PROGRAM TO ADDRESS TENANCY AND NUTRITION NEEDS

In November 2016, MassHealth received federal approval for its flexible services program (FSP), a component of MassHealth’s overall strategy to address the social determinants of health. The FSP launches in January 2020 and will provide certain ACO members with a range of assistance. The goal of this program is to try and address certain social needs known to impact health and potentially reduce an ACO’s total cost of care.

ELIGIBILITY CRITERIA

• Enrolled in one of MassHealth’s ACOs
• Meet at least one health-needs-based criterion (e.g., have a behavioral health need or a complex physical health need)
• Have at least one risk factor (e.g., homeless, at risk of being homeless, or at risk for a nutritional deficiency).

Tenancy Service Examples

• Housing application assistance
• First/last months’ rent, household setup costs
• Help in communicating with landlord

Nutrition Service Examples

• SNAP and WIC application assistance
• Home-delivered meals

One in six MassHealth members is also enrolled in Medicare. There are three managed care programs for individuals enrolled in both Medicaid and Medicare: One Care, SCO, and PACE. More than three-quarters of these “dually eligible” people remain outside managed care arrangements.

MassHealth is in the process of changing its One Care and SCO programs, with the goal of changes taking effect in January 2021. Changes may include passive enrollment, fixed enrollment periods, administrative alignment, changes to payment methods, and value-based purchasing. These changes are collectively referred to as “Duals 2.0.” The state is currently negotiating with the Centers for Medicare and Medicaid Services on its proposed Duals 2.0 demonstration.

**MASSHEALTH’S SUBSTANCE USE DISORDER TREATMENT OPTIONS**

In November 2016, MassHealth received federal approval to cover a more comprehensive array of outpatient, residential inpatient, and community services to combat the substance use disorder (SUD) crisis.

<table>
<thead>
<tr>
<th>SUD SERVICE / SUPPORT</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential Rehabilitation</td>
<td>MassHealth received approval to expand the continuum of SUD care available to MassHealth members, including residential rehabilitation services, transitional support services, and community-based family treatment services.</td>
</tr>
<tr>
<td>Recovery Support Navigators and Coaches</td>
<td>Recovery support navigators develop recovery plans with members, coordinate services, participate in discharge planning and adherence, and help members pursue their health management goals. Recovery coaches, all of whom have experienced SUD recovery, serve as recovery guides and role models. They provide nonjudgmental problem solving and advocacy to help members meet recovery goals.</td>
</tr>
<tr>
<td>Medication Assisted Treatment (MAT) Technical Assistance</td>
<td>Provides funding to offer technical assistance to primary care providers to increase provider comfort and clinical competency for treating SUDs using MAT.</td>
</tr>
<tr>
<td>American Society of Addiction Medicine (ASAM) Assessment and Care Planning Tools</td>
<td>Implemented protocols and tools across treatment settings for assessment, admission, and care planning based on ASAM criteria.</td>
</tr>

MassHealth: The Basics

CONCLUSION

MASSHEALTH HAS PLAYED AN ESSENTIAL ROLE IN DRIVING MASSACHUSETTS’ COVERAGE RATES TO HISTORIC HIGHS:

- Expansion of MassHealth in 2006 reduced the uninsured rate among eligible children by more than 5%.

MASSHEALTH PROVIDES ACCESS TO ESSENTIAL HEALTH SERVICES FOR MORE THAN 1.8 MILLION OF THE STATE’S RESIDENTS:

- Children, seniors, and people with disabilities make up over 60% of the MassHealth population.
- Most MassHealth enrollees have extremely low incomes. In 2018, two-thirds of enrollees had incomes at or below 86% FPL ($10,440 for an individual in 2018).
- Many MassHealth enrollees work in low-wage industries, such as sales, food service, and cleaning.
- MassHealth covers services that commercial insurance would typically cover, plus others such as long-term services and supports and additional behavioral health services.
- Access to MassHealth coupled with other health reforms ultimately led to higher utilization of preventive services and better health outcomes.

MASSHEALTH REPRESENTS A SIGNIFICANT PORTION OF THE STATE BUDGET, BUT THE MAJORITY OF ITS SPENDING IS PAID FOR WITH FEDERAL FUNDING:

- In SFY 2017, total MassHealth spending was $15 billion.
- The federal government reimburses the state for 50% to 93% of MassHealth spending, depending on the population served.
- MassHealth spending growth has moderated in recent years as enrollment has leveled off after enrollment increases resulting from the ACA expansion.
- Most MassHealth dollars are spent on services for a minority of members with high medical needs. Nearly 60% of benefit spending in SFY 2017 was for people with disabilities and seniors, who make up only about a quarter of the MassHealth membership.
- Prescription drug spending and home- and community-based long-term services and supports were the key drivers behind per-enrollee spending growth in MassHealth 2013–2016.

MASSHEALTH IS IMPLEMENTING REFORMS TO THE DELIVERY OF CARE AND HOW IT IS PAID FOR:

- Over 890,000 MassHealth members have been enrolled in new Accountable Care Organizations, which began full operation in March 2018.
- MassHealth is experimenting with new ways to coordinate care and to connect individuals with social services in order to address social determinants of health.
- Massachusetts is investing $1.8 billion in federal and state funding over five years to support the delivery system transformation.
- MassHealth has received federal approval to cover a more comprehensive array of outpatient, residential inpatient, and community services to combat the substance use disorder crisis.
